SUMMARY

Full-stack developer and technical professional with 7+ years of experience spanning enterprise SaaS, IT operations, and system optimization. Experience building, deploying, and optimizing applications with React/Next.js, TypeScript, Node.js, MongoDB, and AWS. Works comfortably across technical and business teams to deliver effective software solutions.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, HTML/CSS

Frameworks & Databases: React, Next.js, Node.js, Express, Tailwind CSS, Bootstrap, MJML, Framer Motion, Auth.js, Zod, MongoDB, Mongoose, Postgres

Cloud & Infrastructure: AWS (EC2, Lambda, API Gateway), Docker, Linux, Nginx, Cloudflare, Vercel, GitHub Actions, REST APIs, CI/CD

Design & Media: Adobe Creative Cloud (Photoshop, Premiere Pro, After Effects), Canva

Certifications: FAA Part 107 (Remote Pilot)

EXPERIENCE

Ultimate Cycle | Powhatan, VA

IT Administrator

Nov 2022 – Dec 2025

- Primary technical owner for infrastructure and operational systems at a nationally ranked powersports dealership (11x Kawasaki “Ichiban” winner; #1 Suzuki Dealer 2019)
- Maintained and integrated systems spanning Twilio SMS, Lightspeed EVO Dealer Management System (DMS), Dealer Spike CMS, Sonicwall Firewall.
- Enhanced the DMS's inline-only emails by building responsive HTML templates with MJML, validated to render across email clients and devices, and added an unsubscribe workflow via AWS Lambda for in-house campaigns.
- Designed and deployed web assets, social media graphics, and digital marketing materials using Adobe Creative Cloud and Canva, improving dealership outreach and digital engagement.

AMC Technology | Richmond, VA

Customer Success Manager

Jul 2022 – Nov 2022

- Managed book of business totaling \$1,473,204 ARR across 23 enterprise accounts internationally regarding CRM and computer telephony integrations.
- Ran technical demos and new product features in sandbox environments for Salesforce, Genesys, SAP, Oracle.
- Coordinated with internal Product, Solutions Engineering, and Development teams on feature requests, bug prioritization, and release planning through Microsoft Azure DevOps and Dynamics CRM.

Account Executive

Nov 2020 – Jul 2022

- Closed enterprise deal with Coca Cola Sabco totaling \$280,000 across 3-year contract term.
- Worked closely with technology partners to identify and source new business opportunities.

VividCortex (acq. SolarWinds, \$117M) | Charlottesville, VA

Account Manager

Apr 2019 – Jan 2020

- Joined prior to successful acquisition by SolarWinds (for \$117M in December 2019), gaining exposure to enterprise SaaS operations during a high-growth period.
- Managed book of business of 84 accounts across multiple verticals equating to a third of the company's active customer base.

Business Development Representative

May 2018 – Apr 2019

- Conducted technical discovery and outreach related to database performance monitoring for open-source databases such as MySQL, PostgreSQL, MongoDB, Amazon Aurora, and Redis.

PROJECTS

SetLoop - Published Chrome Extension | [SetLoop.app](#)

- Voice-controlled video looper. Loop any section, adjust speed, and bookmark moments hands-free via speech or customizable on-screen controls.
- Built with vanilla JavaScript and the Web Speech API, including a custom grammar parser with fuzzy matching for voice commands.
- Deployed via Cloudflare Pages and GitHub Actions CI; published to Chrome Web Store (~100kB shipped, zero runtime dependencies)

PicknFlick - Decision making web app | [PicknFlick.com](#)

- Spin-wheel decision maker with physics-based flick momentum.
- Built with Next.js and Framer Motion; hosted on AWS EC2 (Ubuntu) behind Nginx, containerized with Docker.

GitPub - Brewery locator & journal | [GitPub.vercel.app](#)

- Search local breweries and save custom notes to your profile.
- Built with Next.js, MongoDB, and NextAuth; CI/CD via Github Actions, deployed on Vercel.

Home Server - Self-hosted Ubuntu Server on Unifi VLAN

- Runs my LG TV and Philips Hue lights off a local Ubuntu server using the LG webOS and Hue APIs.
- Built with Docker, Python, FastAPI, Home Assistant, static IP via Unifi.

EDUCATION

University of Richmond

Full-Stack Web Development Certificate

Mar 2022 – Aug 2022

James Madison University

Bachelor of Science, Hospitality Management, Business Minor

Aug 2013 – May 2018
